COVID-19

I understand that the novel Coronavirus (COVID-19) is extremely contagious and may be contracted from various sources. I understand COVID-19 has a long incubation period during which carriers of the virus may not show symptoms and still be contagious.

I understand that I am the decision maker for my health care. Part of this office's role is to provide me with information to assist me in making informed choices. This process is often referred to as "informed consent" and involves my understanding and agreement regarding recommended care, and the benefits and risks associated with the provision of health care during a pandemic. I understand determining who is infected with COVID-19 is exceptionally difficult. I understand this clinic follows Universal Precautions.

To proceed with care, I confirm and understand the following:

I understand my treatment may create circumstances, such as the discharge of respiratory droplets or person-to-person contact, in which COVID-19 can be transmitted. Best practices of disinfecting are being followed to minimize this risk.

I am informed that you and your staff have implemented preventative measures to reduce the risk of spread.

I have read, or have had read to me, the above COVID-19 risk informed consent to treat. I have had the opportunity to ask questions about this consent. I intend this consent to cover the entire course of care from all providers in this office for my present condition and for any future condition for which I seek care from this office.
